KIRUBEL SOLOMON

Full-Stack & Mobile App Developer (in training)

kirubelsolomon2005@gmail.com ☎ +251925056866 github.com/sol4kira Addis Abeba, Ethiopia

SUMMARY

Third-year Computer Science student at Hilcoe School of Computer Science, building toward a career in mobile app development. Comes from a foundation in C++, Java, and core web technologies, and is now expanding into full-stack development (Node.js, Express, MongoDB, React) and relational databases (MS SQL, MySQL). Learns primarily by building complete, real-world applications rather than isolated exercises, and has shipped several full-stack projects independently.

TECHNICAL SKILLS

Languages:	C++, Java, JavaScript, HTML, CSS, SQL
Frontend:	React, HTML5, CSS3, CSS Modules
Backend:	Node.js, Express.js, RESTful API design
Databases:	MS SQL, MySQL, MongoDB (Mongoose)
Tools & Practices:	Git & GitHub (branching/PR workflow), Postman, Figma, Notion, Vite

PROJECTS

STM Shop Management System • Personal / Family Business Project — **github.com/sol4kira/stm_shop →**

Full-stack inventory and shop management system built for a family retail business.

- Built a full-stack system covering product/inventory management, sales, purchases, and customer/supplier credit tracking, using React (Vite), Node.js/Express, and MySQL.
- Designed and implemented the complete backend API layer (Product, Supplier, Customer, Sale, Purchase, and Credit endpoints) with transactional integrity for multi-step operations.
- Built CRUD-heavy React pages (Products, Customers, Suppliers, Sales, Purchases, Customer Credits) including multi-item sales forms, inline entity creation, and payment/balance tracking.
- Developed a reporting module with date-range filters, live summary cards, and drill-down detail views backed by joined SQL queries.
- Followed a Figma design system and a Git feature-branch workflow throughout development.

KS Hospital • Personal Project — **github.com/sol4kira/ks-hospital →**

Hospital information and patient services website.

- Designed and built a hospital information website using HTML, CSS, and JavaScript.
- Focused on clean, responsive front-end structure and layout without relying on external frameworks.

PromptBuddy • Personal Project — **github.com/sol4kira/promptBuddy- →**

Study Prompt Assistance and prompt-saving web application.

- Built a prompt-saving web app with a vanilla JavaScript frontend and a Node.js backend written directly on the core HTTP module (no external framework).
- Implemented a `POST /save-prompt` endpoint that persists user-submitted prompts to a text-based store.
- Handled static file serving and basic request routing from scratch to deepen understanding of how frameworks like Express work under the hood.

EDUCATION

Hilcoe School of Computer Science B.Sc. in Computer Science — 3rd Year (in progress)
